

Employment Search and Career Development Resources

– All links verified on 01 September 2010 –

The first four pages of this document contain various links to career development resources and job search engines. The remaining ten pages are a contact list of government contractors and high-tech employers. Keep in mind that this resource is tailored for individuals with military or other government service background. Although anyone could probably benefit from many of the resources and company contact information listed here, most of the employers listed require the ability to obtain at least a Secret security clearance for most of the high-tech jobs advertised in order to satisfy government contract security requirements.

Just a suggestion:

If you notice errors in this document, or have additional government contractors, high-tech employers, or career development resources to add to this listing, please forward those corrections or additions to me. Feel free to download this document and forward it to anyone else you know that may be interested. Let's try to keep this resource alive and active, for the benefit of all of us. Any feedback you may have regarding this informational resource would be sincerely appreciated.
